Re: Web Assign
From: Peter Williams

Students who have purchased the custom text for Math 110 [Math 120] also purchased access to Web Assign. This is an online system that provides additional help, notes, and practice problems related to the text. We have set up a CSUSB site for this class based on the material we teach. Please give your students the following information as to how to access the material.

1. Go to <http://www.webassign.net>
2. Below the username and password boxes is a link "Have a class key?"
Click on this link.
3. You come to a page with 3 boxes. In the first box enter
csusb
In the second box
9548 [7135]
In the third box
6277 [7911]
Then press submit
4. The next page, make sure the "I need to create a web assign account" is checked then press "Continue"
5. On the next page, the student gets the opportunity to create their own account consisting of a username and password. They should do this by following the instructions provided.
6. For subsequent visits to <http://www.webassign.net> the student uses the account information they set up.
