

Exam # 1 Review

By: My cold

January 28, 2008

Hi kids! This is Corey's cold, who somehow is managing to get Corey's work done while Corey just drinks tea. So here is the extra information regarding the exam that may be of use. Good luck!

1. Section 1.2: The material about the Cauchy-Schwartz inequality, the triangle inequality and orthogonal projection will be on the exam. So really, it's just the extra material from Section 1.2 that was not covered on the quiz. Of course, just sections 1.1 and 1.2 will be on the exam, and we will begin with 1.3 today.
2. General information: Corey's office hours on Tuesday will be moved from the regular 3:30-5:30 time to 2-4 due to an unavoidable conflict. Sorry for the change, but Corey hopes you'll be well-prepared and ready to do well on the test anyway! Don't forget to ROCK ON!
